

Mirapoint RazorGate

MailHurdle Edition

MIRAPOINT DELIVERS PROVEN, APPLIANCE-BASED SOLUTIONS WITH CARRIER GRADE RELIABILITY TO BUILD A SECURE MESSAGING INFRASTRUCTURE WITH CENTRALIZED CONTROL AND SIMPLIFIED MANAGEMENT – ALL AT A DRAMATICALLY LOWER COST.

PRODUCT DATA SHEET

- MailHurdle is placed at the very edge of the network off-loading a majority of spam traffic before it enters an organization's network
- Because many viruses are propagated via email using SMTP programs they too are blocked at the SMTP-layer
- This approach of threat blocking dramatically reduces the bandwidth, storage, and IT administrator resources traditionally wasted on processing spam and virus treats
- Overall catch-rates of 98% are achieved with Mirapoint's multi-layered approach
- Can be deployed in front of any mail server or SMTP system to offer a quick easy to deploy first line defense against inbound threats

Powerful edge blocking protection

Mirapoint's MailHurdle™ connection management technology provides an industry-leading approach that blocks up to 80% of threats at the network edge before network bandwidth, storage, processor and administration resources are wasted. In combination with Mirapoint's multi-layered email security technologies such as RAPID Anti-Spam and zero hour RAPID Anti-Virus, customers can achieve overall catch-rates upwards of 98% with virtually zero false-positives. Automated updating provides the latest and greatest protection against new and evolving threats.

SMTP based network security

RazorGate, MailHurdle Edition blocks malicious message traffic at the SMTP-layer by dropping non RFC-compliant connections. This method of threat blocking reduces overall message traffic by up to 80% resulting in preserved network resources.

Additional security layer

RazorGate, MailHurdle Edition can sit in front of existing edge security appliances for added connection management security. Overall catch-rates and network performance increased due to the reduced message traffic required to be scanned, processed and stored.

Efficient message processing

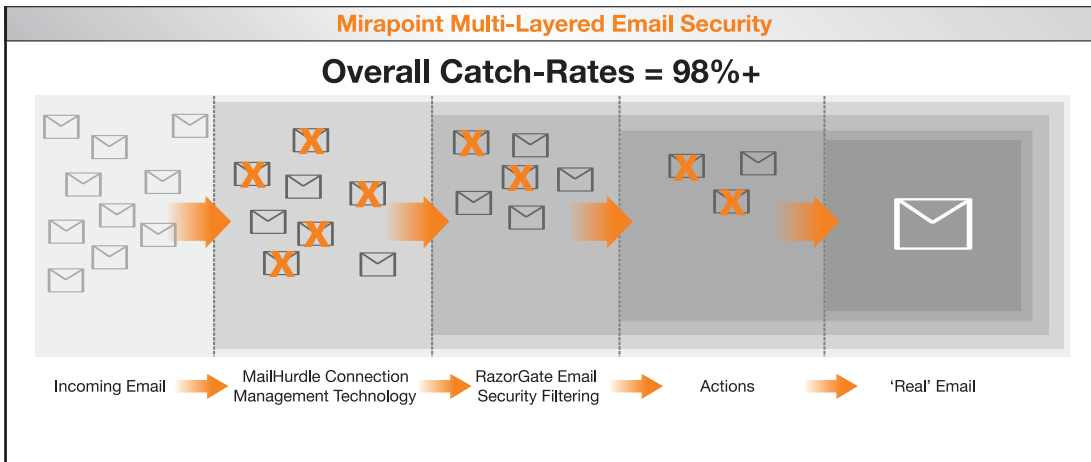

RazorGate, MailHurdle Edition is scalable to meet the needs of any size organization with tested throughput capabilities of 3.5 million messages per box, per day.

Simple deployment and administration

RazorGate, MailHurdle Edition is designed for 'set and forget' administration. Simply deploy the appliance in minutes, and optimize your network by reducing message traffic.

Mirapoint RazorGate

MailHurdle Edition

Unique connection management technology blocks up to 80% of threats at the SMTP-layer.

RG100-MH Technical Specifications

SPECIFICATIONS

Processor Single Intel Pentium 4 - 3.0GHz with 2MB cache

Memory 512MB ECC DDR SDRAM

Networking Dual-channel 10/100/1000 gigabit Ethernet port

Storage Capacity 80GB parallel ATA Drive providing 50GB of capacity

Form Factor 1U; 19" rack-mountable unit size

WARRANTY

Hardware: 1 year warranty **Software:** 90 day warranty includes email only support and updates **Software:** Annual contracts offered for 9x5 or 24x7 support including software updates

About Mirapoint

Mirapoint® is the market leader in appliance-based solutions for secure message networks in enterprise, service provider, and education organizations, with more than 115 million mailboxes served and secured worldwide. Customers use Mirapoint appliances including the Message Server mail appliance and RazorGate mail security appliance to build the messaging infrastructure that intelligently serves, secures and manages email. Mirapoint is headquartered in Sunnyvale, California, with offices throughout North America, Europe and Asia. For more information on Mirapoint, visit its website at www.mirapoint.com.
